

# "Is changing a natural environment a positive or negative choice?" (D&T)

## Vocabulary

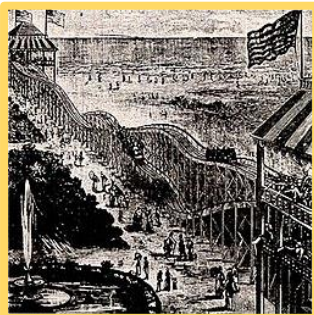

annotated sketch	bench hook	butt joint	diagonal brace	frame	gusset
Design with explanations and features added.	Holds wood firmly.	Two pieces of wood joined at a right angle.	Diagonal piece on the inside, used to strengthen	Outside edges of a structure.	Added to both sides of a joint to strengthen.

## Important People

**LaMarcus Adna Thompson**  
(1848-1919)

- Designed the first rollercoaster.

## What I can remember

- Viking Longboat: shell structure (Y4)
- Iron Age House: free-standing structure (Y3)
- Great Fire of London: free-standing structure (Y2)

## Big Ws: Sawing wood

1) Measure the length of the wood.	2) Place the wood on the bench hook against the raised section with the measure line at the edge.	3) Hold the wood against the bench hook.	4) Hold the saw in one hand.	5) Use the saw to cut the wood, moving the saw backwards first to make a groove.
